

Fixed Gas Detection (Flammable and Toxic)

Our comprehensive range of flammable, toxic and Oxygen gas detectors have options suited to all industries and applications; from low-cost compliance options through to high end solutions designed to minimise maintenance and maximise equipment uptime.

Apex High performance flammable and toxic detector with choice of communications platforms	Searchline Excel World renowned open path IR detector with 200m dynamic monitoring range	Searchpoint Optima Plus Market leading point IR detector with 100 gasses available	Sensepoint XCD Flammable, toxic and Oxygen transmitter and sensor with tri-colour display for viewing status from a distance

Series 3000 XPIS Toxic and Oxygen gas detector with integral gas concentration display	Signalpoint Range Low cost range of flammable, toxic and Oxygen gas detectors	Signalpoint Pro Low cost range of flammable, toxic and Oxygen gas detectors with integral gas concentration display	Sensepoint Range Low-cost ATEX certified flammable, toxic and Oxygen gas detectors	Sensepoint Plus ATEX certified flammable, toxic and Oxygen gas detectors in hazardous locations	Sensepoint RFD Flammable gas transmitter with sensor remote mounting capabilities	Sensepoint High Temperature Sensor Ideal for combustible gases in high temperature areas	RigRat III Wireless, solar-capable, multi-point system providing continuous monitoring of gas hazards

Fixed Gas Detection (Toxic)

When it comes to laboratory work or hi-tech industries such as pharmaceutical or semi-conductor, the most sensitive instrumentation is required. We offer a diverse selection of robust solutions capable of detecting low levels (p.p.b) of toxic gases.

Vertex M Cost effective, 8-24 point toxic gas monitoring with physical evidence of a leak	Vertex™ Flexible device providing continuous monitoring of up to 72 points	Midas® Sensitive detection using smart sensor cartridges and Power over Ethernet (PoE)

Chemcassette® Calibration free toxic gas detection with physical evidence of a leak	Satellite XT Small and compact toxic gas detection with a wide range of sensors	Sat-Ex Comprehensive monitoring of corrosive, combustible and toxic gases in potentially explosive atmospheres	SPM Single Point Monitor A fast response device detecting in the ppb range with physical evidence of a leak	ACM 100 FT-IR Versatile and sensitive detection of up to 40 points with many gases available	ChemKey™ TLD Portable, flexible toxic gas detection with physical evidence of a leak	CM4 Low cost, continuous monitoring of toxic gases on 4 points with minimal maintenance requirement	Satellite PGD Small and portable gas detection ideal for emergency response and laboratory work

Portable Gas Detection

We offer a variety of portable gas detection solutions designed to keep personnel safe; from low-cost disposable units to high functionality devices designed for the most adverse conditions.

Impact Range
High specification device capable of monitoring four gases simultaneously

Enforcer
Quick, automatic calibration of Impact Pro for the cost of a "bump test"

Safelink
Link two Impact Pro devices together for two-way communication and remote monitoring

GasAlertQuattro
Feature rich multi-gas device with simple one-button operation

GasAlertClip Extreme
No-maintenance device offering continuous, detection; 2 and 3 year versions available

GasAlertExtreme
Reliable single-gas monitoring with a wide variety of toxic gases supported

GasAlertMax XT
Multi-gas detector with simultaneous monitoring of up to 4 gas hazards

GasAlertMicroClip
Rugged, ultra-compact, lightweight continuous monitoring of up to 4 gas hazards

GasAlertMicro 5
Continuous monitoring of up to 5 gas hazards at an attractive price point

GasAlertMicro 5 IR
Continuous monitoring of up to 5 gas hazards with a wide selection of toxic gases supported

GasAlertMicro 5 PID
Water and impact resistant continuous monitoring of up to 5 hazards

MicroDock II
Quick, cost effective automatic bump testing of GasAlert range of portable gas detectors

SamplerPak
Motorised pump designed for remote sampling with any GasAlert single or multi-gas portable detector

Controllers (Fixed and Toxic)

Our range of controllers provides solutions for businesses of all sizes; from small, stand-alone solutions through to larger systems that allow for a variety of inputs and relays. Our selection of controllers offers flexibility and a modular approach that allows you to meet the individual requirements of your specific site.

System 57
Precision controller accepting inputs from toxic, flammable, Oxygen, flame, smoke and heat

Touchpoint 1
Flammable, toxic and Oxygen controller for use with the Sensepoint range of gas detectors

Touchpoint 4
Flammable, toxic and Oxygen controller for use with the Sensepoint range offering 4 points of detection

Unipoint
DIN rail mounted controller offering flexibility at low-cost

Your business is protected from the threat of gas, but is your HOME?

Carbon Monoxide (CO) is a dangerous toxic gas that can be produced by any household appliance burning fossil fuels, if not working properly. Ensure you and your family are safe from this potentially fatal hazard by using a CO alarm.

- SF450EN CO alarm**
- Six year guaranteed operational life with no need to change any parts or batteries
 - Optimised for use in all domestic environments, boats and caravans
 - Officially approved to EN50291:2001 – the European Standard for Domestic Carbon Monoxide Alarms

Additional Service and Support

Aside from being market leading experts in gas detection, we offer more resource, infrastructure and support than anyone else. With this in mind, we provide a range of additional service and support options designed to offer flexibility, peace of mind and a reduced ongoing cost of ownership.

Expert Solutions – a flexible way to build your own bespoke package

At Honeywell Analytics, we understand that you want the flexibility of being able to create support packages that reflect your own needs. Expert Solutions allows you to create a bespoke package of options designed to meet your individual requirements:

- Only choose the elements you need
- Total freedom and flexibility (combine any options)
- Reduced ongoing costs

Technical Service and Support Options

- **Field Maintenance:** Rely on our Field Engineering team to undertake all your maintenance needs
- **Preventative/Corrective Maintenance:** Work smart and minimise downtime with scheduled maintenance
- **Resident on-site maintenance and support:** All the benefits of in-house support, non of the logistics
- **24/7 emergency call out:** Minimise the downtime of your equipment with our rapid response solution
- **Technical Support Centres:** With a global network of service and repair facilities, local support is never far away
- **Installation and commissioning:** Work with our Engineers to ensure that your equipment is installed as quickly and easily as possible
- **System Integration:** Expert solutions for the integration of gas detection into existing equipment
- **Extended product warranties:** Flexible warranty packages designed to deliver extra protection
- **Factory Acceptance Test (FAT):** A robust test service designed to enhance peace of mind
- **Project management:** Professional, flexible, expert management of your project
